

UAE E-Invoice Field Guide

Insurance Broking (IBMS) - Source System Fields

English only

Brief explanation of each field: What it is / Why needed / Example.

Aligned with E-Invoice Hub POST /v1/invoices (Peppol PINT-AE).

Hub auto-fills: totals, line IDs, Peppol profile IDs, TaxScheme VAT, endpoint from TRN.

IBMS must send: identity, parties, lines, and type-specific extras.

1. Document Types

TAX_INVOICE (380)

Type

What: Standard VAT tax invoice

Why needed: Normal broking commission / fee bill with VAT

Example: Commission on POL-8891 billed to client

CREDIT_NOTE (381)

Type

What: Credit against a prior tax invoice

Why needed: Cancel or reduce previous bill (policy cancel / clawback)

Example: Credit AED 500 vs INV-100245 after policy cancel

DEBIT_NOTE (383)

Type

What: Debit linked to a prior invoice

Why needed: Extra charge when commission was under-billed

Example: Extra AED 200 commission after endorsement

SELF_BILLED_TAX_INVOICE (389)

Type

What: Buyer issues invoice for supplier

Why needed: Agreed self-billing (seller = issuer, buyer = supplier)

Example: CMIB self-bills underwriter commission

SELF_BILLED_CREDIT_NOTE (261)

Type

What: Credit for a self-billed tax invoice

Why needed: Adjust/cancel prior self-billed amount

Example: Self-bill credit after premium refund

COMMERCIAL_INVOICE (480)

Type

What: Invoice when all lines are E or all O

Why needed: Exempt / out-of-scope supplies (not a standard VAT tax invoice)

Example: All lines vatCategory E with exemption reason

COMMERCIAL_CREDIT_NOTE (81)

Type

What: Credit for a commercial invoice

Why needed: Credit pure E/O commercial bill

Example: Credit exempt fee previously billed

2. Header Fields

tenantCode

Required

What: Company/tenant code in Hub

Why needed: Routes invoice to correct broker company and API key tenant

Example: CITY_MARINE

sourceSystem	Required
What: Source application code	
Why needed: Must match integration so Hub accepts IBMS traffic	
Example: IBMS_BROKING	
idempotencyKey	Required
What: Unique retry-safe key	
Why needed: Prevents duplicate invoice if IBMS retries the same POST	
Example: BROKING-COMM-100245	
documentType	Required
What: UAE document type	
Why needed: Tells Hub which Peppol type and validation rules to apply	
Example: TAX_INVOICE	
invoiceNumber	Required
What: Business document number (BT-1)	
Why needed: Official number shown to customer / FTA	
Example: INV-100245	
sourceDocumentId	Required
What: Internal IBMS document id	
Why needed: Links Hub record back to IBMS voucher / commission id	
Example: 100245	
issueDate	Required
What: Issue date (BT-2)	
Why needed: Legal date the invoice/credit was issued	
Example: 2026-08-19	
dueDate	Conditional
What: Payment due date (BT-9)	
Why needed: Required when amount to pay > 0	
Example: 2026-09-18	
currencyCode	Optional
What: Invoice currency	
Why needed: Defaults to AED; non-AED needs FX fields	
Example: AED	
taxCurrencyCode	Optional
What: Tax reporting currency	
Why needed: Must be AED when invoice currency is not AED	
Example: AED	

exchangeRate Conditional

What: FX rate to AED

Why needed: Required when currency is not AED

Example: 3.6725

taxInclusiveAmountInAed Conditional

What: VAT-inclusive total in AED

Why needed: Required when currency is not AED

Example: 1928.25

references.policyNo Optional

What: Insurance policy number

Why needed: Broking reference (Hub accepts; not yet mapped to Peppol XML)

Example: POL-8891

notes Optional

What: Free-text remark

Why needed: Extra human note on the document (max 1000 chars)

Example: Commission for marine cargo insurance

3. Seller & Buyer

seller.name / buyer.name Required

What: Legal party names

Why needed: Who supplies and who buys - mandatory for UAE e-invoice

Example: City Marine Insurance LLC / ABC Trading LLC

seller.trn / buyer.trn Required*

What: UAE Tax Registration Number

Why needed: Tax identity for FTA; buyer TRN optional only on commercial E/O

Example: 100123456700003

address.line1, city, state, countryCode Required

What: Postal / emirate address

Why needed: UAE Peppol needs street, city, emirate, country (seller AE)

Example: Business Bay / Dubai / DXB / AE

legalRegistration + schemeAgencyName Required

What: Trade licence (or EID/PAS/CD) + issuing authority

Why needed: Company legal id plus who issued it (BTAE-12)

Example: tradeLicense 1045678 + Department of Economic Development

endpointId / endpointScheme

Optional

What: Peppol endpoint

Why needed: If omitted, Hub uses first 10 digits of TRN; scheme default 0235

Example: 1001234567 / 0235

contact.name / phone / email

Optional

What: Party contact details

Why needed: Optional contact person for seller or buyer

Example: accounts@citymarine.ae

4. Line Items

description

Required

What: Line service / item text

Why needed: Explains what is billed (commission, fee, adjustment)

Example: Broking Commission - Marine Cargo Policy POL-8891

quantity

Required

What: Number of units

Why needed: Usually 1 for commission; used to compute line net

Example: 1

unitCode

Optional

What: Unit of measure

Why needed: UN/ECE unit code; default EA (each)

Example: EA

unitPrice

Required

What: Price per unit before VAT

Why needed: Line net = quantity x unitPrice (Hub calculates)

Example: 5000

vatCategory

Required

What: UAE VAT category code

Why needed: Controls tax treatment: S / Z / E / O / AE / K / G

Example: S

vatRate

Required

What: VAT percentage

Why needed: Must match category rules (e.g. S -> 5)

Example: 5

vatExemptionReason

Conditional

What: Text reason for E / AE / O / K / G

Why needed: FTA needs why the supply is not standard-rated

Example: Exempt supply under UAE VAT law

rcmNatureCode

Conditional

What: Reverse-charge nature code

Why needed: Required when vatCategory = AE (BTAE-09)

Example: DL8.48.8.2

Sample: qty 1 x unitPrice 5000 + vatCategory S @ 5% -> net 5,000 + VAT 250 = 5,250 AED

5. Type Extras

paymentMeans.code

Conditional

What: Payment method code (UNCL 4461)

Why needed: Needed for tax / debit / self-bill / commercial invoices

Example: 30 = Credit transfer (bank)

paymentTerms.note

Optional

What: Human-readable payment terms

Why needed: Optional note such as Net 30 days

Example: Net 30 days

precedingInvoiceRef.id

Conditional

What: Original invoice number

Why needed: Links credit/debit to the invoice being adjusted

Example: INV-100245

precedingInvoiceRef.issueDate

Optional

What: Original invoice issue date

Why needed: Optional date of the referenced invoice

Example: 2026-08-19

creditNoteReasonCode

Conditional

What: FTA credit reason code (BTAE-03)

Why needed: Required on credit-note family documents

Example: DL8.61.1.A

profileExecutionId

Conditional

What: 8-bit UAE transaction flags

Why needed: Self-bill must be 00000000; else freezone / agent / export flags

Example: 00000000

principalTrn

Conditional

What: Principal TRN for disclosed agent

Why needed: When broker bills as disclosed agent (BTAE-14)

Example: 100555566600003

6. VAT Codes

Code	Meaning	Broking use
S	Standard 5%	Most UAE broking commission
Z	Zero-rated	Zero-rated supply if applicable
E	Exempt (needs reason)	May auto-switch to Commercial
O	Out of scope (needs reason)	May auto-switch to Commercial
AE	Reverse charge (+ rcmNatureCode)	Buyer accounts for VAT
K	Intra-GCC (needs reason)	Intra-GCC treatment
G	Export outside GCC (needs reason)	Export of service

Note: If all lines are E or all are O, Hub may auto-change TAX_INVOICE -> COMMERCIAL_INVOICE (and CREDIT_NOTE -> COMMERCIAL_CREDIT_NOTE). Self-billed and debit notes are never remapped.

7. Quick Checklist

- Credentials + tenantCode + sourceSystem = IBMS_BROKING
- Seller & buyer: name, TRN, address, trade licence + schemeAgencyName
- Correct documentType
- Lines: description, qty, unitPrice, vatCategory, vatRate
- Invoice family: paymentMeans.code + dueDate (if payable > 0)
- Credit family: precedingInvoiceRef + creditNoteReasonCode
- Self-bill: profileExecutionId = 00000000 and correct seller/buyer roles
- AE lines: vatExemptionReason + rcmNatureCode
